UNIVERSIDAD DE GRANADA

Escuela Técnica Superior de Ingeniería de Caminos, Canales y Puertos

Incoming Students

Welcome to the ETSICCP – University of Granada

All the Incoming students are welcome to the School of Civil Engineering (Bachellor, Master and Doctorade)

Are you planning to join the School of Civil Engineering (ETSICCP) at the University of Granada as an international or exchange student? This website is your one-stop resource for everything you need to prepare your academic and personal stay in Granada.

Here you will find comprehensive **information** about our School, including the **curriculum** for both the Civil Engineering Degree and Master's programs, as well as details on the **academic offer**, **academic calendar**, and **study plans** available in English. Our **course catalogs** and **subject guides in English** will help you plan your studies effectively.

We provide dedicated resources for **international students**, such as our **Foreign Language Support Program**, and practical tools like **guides, flyers, information sheets, and videos** about the University of Granada (UGR). You'll also find essential tips on **preparing your stay in Granada**, information about the **UGR Modern Language Centre**, and our **Buddy Program** to help you integrate quickly into student life.

The website includes information on the **Vice-Rectorate for Students**, details about **internships** at the School of Civil Engineering – including the **Internship Catalog** – and opportunities to pursue a **Doctorate** and join our **research groups**.

For any matters related to international mobility, you can contact the Vice Deputy for Internationalization:

Ms. María Isabel Rodríguez Rojas
Vice deputy for Internationalization

Academic offer

The School of Civil Engineering offers a comprehensive academic program at both undergraduate and master's levels, designed to equip students with the knowledge and skills required to face the challenges of modern civil engineering. Here you will find detailed information about our academic calendar and study plans for each program. We invite prospective and current students to explore our offerings and plan their academic journey with confidence. If you have any questions or require further guidance, please do not hesitate to contact the Vice-Deputy for Internationalitation.

- Academic calendar

To facilitate the preparation of Learning Agreements for incoming students, a list of all available courses is provided in the link below, along with links to the corresponding course guides.

In the case of fourth-year courses, the guides are provisional but will allow students

to gain an approximate understanding of their content:

- Academic Offer

Internships

The School of Civil Engineering promotes practical experience through a wide range of internship opportunities for both undergraduate and master's students. Our programs support incoming students who wish to gain hands-on experience within our academic and professional network. These internships are a valuable component of academic and professional development, bridging the gap between theory and practice.

The University of Granada (UGR) offers opportunities for internships within its various services, units, laboratories, etc.

However, there are internal regulations regarding the admission of internship personnel, which specify the requirements and conditions for undertaking this type of stay:

STUDIES + INTERNSHIP. This option is for students enrolled in courses at UGR (both UGR students and those participating in mobility programs such as SICUE, ERASMUS+, exchange, or free mobility). The internship will be included in the Learning Agreement as one more subject and will be carried out through the Internal Training Plan.

- External Academic Internship Regulations of the University of Granada
- Employment Promotion and Internships Center

INTERNSHIP STAYS. Students from other universities or educational systems may carry out internships at UGR under the framework of signed programs and agreements. To do this, you must follow a series of steps to obtain authorization. See the resolution issued by the Office of the General Manager on this matter.

According to the resolution, internship stays must fall under one of the following categories:

- An active bilateral agreement between the student’s home university and UGR.
- Student participation in a current national or international program in which UGR is involved (e.g., the Erasmus Program).

- Student participation in a current national or international project in which UGR is involved.

For detailed information on procedures, requirements, and available opportunities, please consult the next links.

- Information about intership

Doctorade

The School of Civil Engineering hosts a diverse and dynamic range of research groups that reflect our commitment to academic excellence and innovation. These groups are actively involved in cutting-edge research across various fields of civil engineering and offer valuable opportunities for collaboration at the master's and doctoral levels. Whether you're a student seeking to deepen your academic experience or a partner institution exploring joint projects, our research groups represent a gateway to high-level scientific and technological advancement. Below, you will find a link for listing our research groups and their main areas of focus.

Erasmus Friendly

The Internationalization Department proposes a international action program for the Civil Engineering Degree and the Master's Degree in Civil Engineering called ‘FOREIGN LANGUAGE SUPPORT PROGRAM FOR INCOMING STUDENTS'. In the subjects belonging to this program, teachers will assist INCOMING students with counseling in

Copyright© 2026 Universidad de Granada

English, which will consist of the following:

- They will prepare a summarized teaching guide in English.
- Provide documentation in English as far as possible; glossaries of terms, class presentations, bibliography...
- Will provide tutorials in English.
- Allow the presentation of written or oral work in English.
- Will conduct examinations in English.

The subjects belonging to the program can be consulted in the following file: English Friendly 2025
