Oferta de beca de doctorado “Hydro Nation PhD Scholars Programme of The Scottish Government”

12/02/2013

Noticias Generales

The Hydro Nation PhD Scholars Programme of The Scottish Government is now open. It offers 4 year scholarships to support research feeding into the Scottish Government agenda regarding the themes: Valuing Water, Water Governance, Water and Energy and Catchment Management. The annual stipend for these studentships will be £14,850 (running for 4 years), with up to £15,000 per year for University fees.

If you know of any good candidate interested in pursuing a PhD in Transboundary Water Management (Water Governance), with special emphasis in (but not only) Transboundary Aquifers Governance feel free to put her/him in touch with me. Potentially the candidate working with me could also be working with colleagues based in Scotland such as Prof. Robert Kalin, Professor of Environmental Engineering for Sustainability at the University of Strathclyde and Dr Alistair Rieu Clarke, Reader in International Law at the IHE-HELP Centre for Water Law, Policy and Science at the University of Dundee. You can find further information about my research interests and past work, as well as that of my colleagues at the following pages:
