FOREIGN LANGUAGE SUPPORT PROGRAM FOR INCOMING STUDENTS

The School of Civil Engineering of the University of Granada is fully aware of the importance of giving greater international visibility to our center and, above all, of the need to respond to an increasingly interrelated, transversal and multicultural university landscape.

In this sense, the internationalization of the curriculum is a fundamental tool to increase the attractiveness of our school to students from all over the world, so that they see in our center the best place to carry out their studies in Civil Engineering.

To this end, the Internationalization Department proposes a new international action program for the Civil Engineering Degree and the Master's Degree in Civil Engineering called '**FOREIGN LANGUAGE SUPPORT PROGRAM FOR INCOMING STUDENTS**'. The objectives of this program are:

- Facilitate mobility students who do not yet have an appropriate level of Spanish to follow the subjects taught in Spanish.
- Promote new agreements and attract international students by proposing an educational offer more appropriate to the needs of an increasingly globalized university system.
- Prevent language from being a barrier in the learning and passing of subjects.

The professors of the center who wish to be part of this program will facilitate the monitoring and evaluation of the subject to the foreign students who request it, following the following items:

- They will prepare a summarized teaching guide in English or other language.
- Provide documentation in English or other language as far as possible; glossaries of terms, class presentations, bibliography...
- Will provide tutorials in English or other language.
- Allow the presentation of written or oral work in English or other language.
- Will conduct examinations in English or other language whenever possible.
